

# FleetView

## Managers want to know where their trucks and drivers are at all times.

Moreover, they want to be able see where they were, where they are going, and be able to see critical information like hours available all from one screen. FleetView provides near real-time view into the status of your fleet including drivers, vehicles and sites.

### Features

- Find assets on a map and their motion state, highlighting the most critical elements.
- Filters based on organization, resource groups, and quick filters such as activity (moving, stopped), in violation, with co-drivers, vehicles without drivers, and active.
- Drill down into vehicle and driver data from quick filters.
- Vehicle locations updated every 5 minutes.
- View breadcrumb or last known location details.
- Road, aerial and bird's eye mapping views with real time traffic.
- Locate vehicles near customer sites and see HOS data and action screens for quick dispatch.
- Link to other features in the system like messaging, reports, or entity management.
- Activity detail on each driver from one screen.
- Expandable to full screen view, and the ability to minimize driver detail.
- Icon based views to see identify critical items like violation or low driver time.
- Ability to search for driver or truck IDs.

### Benefits

- Quickly see which vehicles are available, in motion, or stopped
- Increased customer service as dispatchers and customer service representative always know where trucks are at and where they are heading
- Accountability for drivers and decreased out-of-route miles due to proactive monitoring
- Decreased administration time to find drivers and vehicles bested suited for a job.
- With driver breadcrumb analysis, quickly see where trucks could be overlapping routes, leading to better route plans.
- Quick filters and views, including organization and resource groups. Fleets can easily build the view of trucks they want to see.
- Ease of use – quickly find drivers and trucks and execute orders
- Viewable across operating systems and browsers, including smartphones and tablets without the addition of ActiveX controls
- Types of views, including automatic view allowing for quick switching between road, satellite and bird-eye view maps
- Quick filters and views with HOS related data (compared to only historical data or simply dots on a map)
- Easy to use interface with all needed information for critical decision making
- Addition of trip and site data on one screen

## Getting More from Your Technology Investment

The Omnitracs Alliance Program facilitates integration of Omnitracs solutions with other leading companies that provide complementary technologies and services. This program taps into the power of integration in order to best meet the needs of our shared customers.

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

The Omnitracs Services Portal provides access to a suite of web-based fleet management applications, including satellite mapping. Data from the Services Portal can be integrated into your existing enterprise systems.

## About Omnitracs, LLC

Omnitracs is the global pioneer of innovative and comprehensive fleet management solutions transforming the transportation industry through technology and insight. Omnitracs' more than twenty five years of leadership and experience uniquely positions it to serve the industry's needs for seamlessly integrated compliance, safety, productivity, route planning and delivery, analytics, and transportation management system solutions. Omnitracs' more than 1000 employees deliver software-as-a-service based solutions that help more than 40,000 private and for-hire fleet customers manage over 1,500,000 mobile assets in more than 70 countries. Omnitracs' portfolio encompasses Omnitracs Latin America and the solutions formerly known as Roadnet Technologies, XRS Corp, Sylectus, and Omnitracs Analytics. Omnitracs is a member of the Vista Equity Partners group of companies.
